PROFESSIONAL SUMMARY

Sales-driven Computer Science student with a decade of client-facing experience in high-volume, high-pressure environments and hands-on experience building AI and real-time systems. Combines consultative selling instincts with technical depth to communicate complex product value clearly and close relationships with confidence. Targeting Account Executive roles at B2B SaaS and tech startups.

EDUCATION

University of San Francisco

Bachelor of Science in Computer Science.

Dec 2025

Relevant Coursework: Calculus, Discrete Math, Linear Algebra & Probability, Data Structures and Algorithms, Full-Stack Web Development, Software Development, Foundations of AI, Computer Architecture, Operating Systems

EXPERIENCE

AI Training Fellow

April 2026 – Present

Handshake AI

Remote

- Design and evaluate real-world computer workflow tasks for Project Brass II, prompting AI models to complete MacOS workflows within defined scopes using clear, unambiguous instructions.
- Write targeted prompts to expose model failure modes in specific domains and surface actionable findings for research teams.
- Evaluate AI responses for accuracy, consistency, and practical usefulness across a range of tasks and topics.

Server

March 2024 – March 2026

McCalls Catering

San Francisco Bay Area, CA

- Delivered white-glove service at events with 100+ guests, managing client expectations with zero margin for error.
- Built rapport quickly with new clients and coordinated across event operations teams to ensure seamless, high-quality delivery.

Server

Aug 2022 – Feb 2024

Tataki Sushi & Sake Bar

San Francisco, CA

- Generated \$1,500+ in nightly revenue across 4 tables averaging 15 covers per hour through consultative recommendations that anticipated guest needs before they were voiced.
- Processed 80+ financial transactions nightly with complete accuracy while sustaining consistent service across a high-volume floor.
- Managed 15-20 concurrent guest relationships, resolving objections and issues on the spot without disrupting service flow.

Sales Development Representative

Sept 2019 – Dec 2021

Flipstars Real Estate Investment Group

San Bernardino, CA

- Executed 150+ outbound cold calls daily to identify and qualify distressed property owners, building a pipeline of 200+ leads tracked end-to-end in a self-built CRM.
- Managed full-cycle outbound prospecting across cold call, door-to-door, email, and SMS channels to generate qualified leads.
- Designed and maintained CRM infrastructure to track lead status, follow-up cadence, and acquisition progress across an acquisition pipeline.

PROJECTS

AI Log Analysis System

Sept 2025 – Dec 2025

Python, Go, Redis, Clickhouse, SQL, Docker, LLM Integration

- Built a real-time log analysis system that processed thousands of security logs and flagged threats automatically.
- Designed a dashboard to visualize system health and activity, improving developer visibility.
- Analyzed model performance data to compare outputs and support data-driven decision making.

Search Engine

Jan 2024 – May 2024

Java, CSS, HTML

- Built an inverted index search engine in Java capable of processing and indexing 10,000+ documents using multithreaded architecture.
- Optimized query and processing time through algorithmic improvements and thread management.
